1. This application contains claims directed to the following patentably distinct species of the claimed invention: An absorbent composite with a 1st and 2nd stratum with particular fibers. For example claims 1,33, recite a species (but is somewhat generic), 14 recites a species, 15 recite a species, 16 recites a species and claims 17 and 18 are further species of claim 16. Claims 21,22, and 23 are reciting distinct species. Claim 24 is reciting a species and claims 25 and 26 are each reciting species of claim 24. The following claims are also considered to each be reciting distinct species:

31,32,63,64,65,67,68,69,71,72,73,75,76,77. Applicant needs to identify what species is desired to be prosecuted. This means choosing what the fibers of the 1st stratum will be made from as well as what kind of binder is present in the 1st stratum. The fibers and binder of the 2nd stratum must also be chosen. Applicant should make the species chosen clear to the examiner and identify what claims read on the elected species (including claims that are generic to the elected species but that are not generic to all species).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 62,66,70,74, are considered to be generic to all the species of the invention and will be examined regardless of what species is chosen.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3761

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to George Renzoni on 7-27-01 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Renzoni indicated that he would call the examiner back with an election; however as of the date of this office action no election had been made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3761

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis Ruhl whose telephone number is 703-308-2262. The examiner can normally be reached on Tuesday through Friday.
